IDENTIFIERS	*New Jersey

ABSTRACT

The purpose of this volume is to add meaning to the statistics of New Jersey's diverse public libraries. This report interprets data obtained from the annual reports of 295 public libraries in the state. The report begins with an introduction describing how the data were analyzed. The introduction then displays the following tables graphically to illustrate some of the trends that occur as population or total expenditure increase: local tax support per capita; percentage of staff with professional certification; equalized valuation per capita; and materials expenditures as a percentage of total expenses. Also included are suggested uses for the tables. The analyses of the data are presented in four categories: all public libraries in New Jersey; public libraries by region; public libraries by population served; and public libraries by total expenditures. Information provided includes the following: equalized valuation per capita; local tax support per capita; state library aid as a percentage of total income; salaries, wages, and benefits as a percentage of total expenditures; library materials as a percentage of total expenditures; circulation per capita; and total expenditures. ACKNOWLEDGMENTS

Acknowledgment is made to the Library Research Center, Graduate School of Library Science, University of Illinois at Urbana-Champaign, whose **Analyses of the 1979-80 Illinois Public Library Statistics** (1980) provided the model, general format and some of the analytical measures used in this publication.

Other useful data was obtained from **Output Measures for Public Libraries: A Manual of Standardized Procedures**, by Douglas Zweizig and Eleanor Jo Rodger, American Library Association (Goals, Guidelines and Standards for Public Libraries Committee, Public Library Association), 1982.

The computer programs used in this compilation were developed by the Bureau of Information Resources Management, Division of Administration, New Jersey State Department of Education.

Word-processing of the introductory material in this volume was done by Lorraine Jones.

Rank of Local Tax Support Per $1,000 of Equalized Valuation 80

PREFACE

Made possible by the entering of 1992 data into the public library database, the purpose of this volume is to add meaning to the statistics of New Jersey's diverse public libraries. By reducing such large amounts as equalized valuation to a per-capita basis or by looking at circulation of library materials compared to the number of volumes owned, for example, libraries of all sizes can be viewed in a new way.

As this publication is intended to assist the public library director and board of trustees, your comments and suggestions are welcomed and needed. Please send me your ideas at your earliest convenience.

Robert K. Fortenbaugh
Assistant Coordinator, Library Programs
New Jersey State Library

INTRODUCTION

Analyses of New Jersey Public Library Statistics for 1992 interprets data obtained from the annual reports of 295 public libraries. Using data published in **New Jersey Public Library Statistics for 1992**, this publication analyzes data in several different ways.

The libraries have been divided into groups by population and expenditure levels. Therefore, each library is listed twice. After each population or expenditure listing, a page follows which gives the arithmetic average, standard deviation, high, low, three percentile ranks and number of libraries reporting, calculated for each data element. The top half of each "averages and percentiles" page presents columns previously published in **New Jersey Public Library Statistics for 1992**. The bottom half of each page gives columns for this volume. (Because of limitations of computer-formatted printing, some columns may appear in a different grouping, but all columns are listed in the same order on all pages.)

The **average** (arithmetic mean) is the sum of the data for all libraries in a group divided by the number of libraries in that group. The **standard deviation** is a measure of distribution around the average of the values for all libraries in the group. In a normal distribution, roughly two-thirds of the values fall within plus-or-minus one standard deviation from the mean. The **maximum** is the highest value reported for the group; the **minimum** is the lowest value reported. The three **percentile** ranks, **75th**, **50th**, and **25th**, are the values below which 75% of the group, 50% of the group, and 25% of the group are found.

For items summarized from the **New Jersey Public Statistics for 1992**, see pages 2-4 of that publication for definitions of the column headings.

Each library is listed by **LIBRARY NAME**, **POPUL SERVED 1992** (in the population listings), **TOTAL EXPENDS** (in the expenditures listing), and **CO**, a two-digit **COUNTY** code, for which a key is provided in the County/Statewide Summary.

Several ratios and percentages for each library were calculated from the data available, as defined above. They are as follows:

Explanation (All data is for 1992)

EQ VAL PER CAP ($) - Equalized valuation per capita, in dollars: "Equalized valuation" is the true value of real property within a local taxing district, computed from the aggregate assessed valuation and actual sales of property, and used to distribute equitably State school and library aid, apportion county taxes, and measure municipal debt limits. The population count used is that listed in the **New Jersey Library Statistics** for this year.

LOC TX SUP PER $1,000 EV - Local tax support per $1,000 in Equalized Valuation: Local tax support (income) for the public library per $1,000 in Equalized Valuation. This is a measure of the local support of the library compared to the true value of real property of the municipality or county.

LOC TAX SUP PER CAP ($) - Local tax support per capita, in dollars. The library income from local tax sources, per capita. This is another measure of the local support of the library.

LOC TAX SUP % OF TOT INC - Local tax support of a percentage of total income: The percentage of the library's total current operating income from local tax support.

PSCA % OF TOT INC - Per Capita State Library Aid as a percentage of total income: The percentage of the library's total income from the category of state library aid known as "per capita" aid.

PSCA % OF LOC TX SUP - PSCA - Per Capita State Library Aid as a percentage of the sum of local tax support and Per Capita State Library Aid: The percentage of the library's total budget from local-tax and state-wide aid sources that Per Capita State Library Aid represents.

SAL, W, B % OF TOT EXP - Salaries, wages and benefits as a percentage of total expenditures: Percent of total expenditures spent for salaries, wages and benefits of library employees, including maintenance personnel.

LIB MAT % OF TOT EXP - Library materials as a percentage of total expenditures: Percent of total expenditures spent for all library materials.

CIRC PER CAP - Circulations per capita: Number of circulation transactions per capita of the population served.

CIRC PER FTE - Circulation per full-time equivalent staff: Number of circulation transactions per full-time equivalent staff (based on a minimum 30-hour week, or actual hours worked if greater than 30).

CIRC PER VOL HELD - Circulations per volumes held: Number of circulation transactions per cataloged volumes in the collection at the end of the year.

CIRC PER HRS OPEN - Circulations per hours open: Total weekly circulation transactions per number of hours main library was open for public service in a week.

PROF % OF TOT STAFF - Professionals as a percentage of total staff: Percent of total library staff holding a New Jersey Professional Librarian Certification.

FTE PER M POP - Full-time equivalent staff per 1,000 population: Number of full-time equivalent staff per 1,000 population.

FTE PER WK HRS OPEN - Full-time equivalent staff per week hours open: Number of full-time equivalent staff per number of hours main library was open for public service in a week.

VOLS PER CAP - Volumes per capita: Number of cataloged volumes in the collection at the time of the year, per capita.

% VOLS ADDED - Percent of volumes added: Percent of volumes held that were purchased and added to the collection.

VOLUMES ADDED PER CAP - Volumes added per capita: Number of cataloged volumes purchased and added per capita.

TOT EXP PER CAP ($) - Total expenditures per capita, in dollars: Total library expenditures in dollars per capita.

MAT EXP PER CAP ($) - Materials expenditures per capita, in dollars: Library materials expenditures in dollars per capita.

TOT EXP PER CIRC ($) - Total expenditures per circulation, in dollars: Total library expenditures in dollars per circulation transaction.

TOT EXP PER HR OPEN ($) - Total expenditures per hours open, in dollars Total library expenditures in dollars per number of hours main library was open for public service in a week.

These ratios and percentages are shown first by county and statewide summary, then by Regional subtotals, Next, the averages and percentiles of the printed and derived data are presented in statewide and regional summaries. Then, rations and percentages are shown for each library individually within each population or expenditure group.

After each population group or expenditure category, the averages and percentiles of the printed and derived data are given.

The averages for ratios and percentages are based on data in each case for all libraries taken separately rather than the total of one data element divided by the total of another element.

As indicated in the Preface, a ranking of local tax support per $1,000 of Equalized Valuation has been continued: All computed values for the variable "LOC TX SUP PER $1,000 EV" have been ranked from low to high for all 295 libraries reporting. Percentiles (25th, 50th, 75th and 100th) are given for all libraries reporting and are presented by county, population served, and expenditure categories. Where a "." is printed, the variable has not been computed because data was not reported.

Comparisons Among Groups of Libraries

Study of the averages gives a good general picture of each population group and each expenditure category. The average of each data element not only describes the group as a whole but also can provide interesting comparisons with other groups. For example, a county library may wish to compare its member libraries and itself with other county library systems.

We have selected certain data from various tables from throughout this volume and displayed them graphically to illustrate some of the trends that occur as population or total expenditure increases.

Suggested Use of the Tables

Individual libraries can readily be compared with others in the same population-sized group or the same expenditure category. For example, the Madison Public Library serves a population of 15,850 and has total expenditures of $891,093. It is listed individually in the tables for "Population=15,000-19,999" and Total Expenditures= $750,000-999,999." When compared with other libraries in the same population group (see page 38, "Averages and Percentiles of Statistics ...Population = 15,000-19,999"), Madison's local tax support per capita is $39.17, above the group average of $31.75, just below the 75th percentile of $40.38. Its 10.5 circulations per capita are slightly above the 75th percentile of 10.1. Other evidence of collection use is that of circulations per volume held which at 1.5 is below the group average of 1.9 but above the lowest 25% of the libraries in its population group (at 1.3). Madison holds 7.2 volumes per capita, the highest value in the group. The high volumes per capita figure has a noticeable effect upon the circulation per volume held value in Madison's case

When compared to other libraries in the same expenditure category, Madison's local tax support per capita ($39.17) is below the 75th percentile ($40.53), while its circulations per capita (10.5) are above the 75th percentile (10.2). Madison's total expenditure per circulation is $5.36, placing it just below the median in this group (5.46).

With this brief example, it can be seen that any library can compare itself not only with other libraries but with other groups of libraries.

In order to make the tables in this volume as meaningful as possible, data which are missing have been excluded from the calculations. Where a data element cannot be computed, an X is printed in the column. In figuring averages and other statistics for the group, that library's ratio or percentage is deleted. A final word of caution on interpretation of the tables in this volume. Although every effort has been made to include only meaningful information in the calculations, one or two libraries which are very different from the group as a whole can alter the averages enough that a truly representative picture is not shown, especially when the total group is small. This may be so in certain columns, especially in the largest population and highest expenditure categories, as well as the statewide totals. Because of very high values reported by some large libraries, those averages and standard deviations may be distorted. In such cases, the percentile rankings will be less influenced.
